TOVEY, SIR DONALD FRANCIS. Main stream of music, and other essays; collected, with an introd. by Hubert Foss [Eng title: Essays and lectures on music]. 404p $4 Oxford
780.4 Music 50-3208

"A posthumous collection of 18 essays published in England, 1949, under the title Essays and Lectures on Music, and before that over a period of more than twenty-five years in such relatively inaccessible spots as The Listener and Cobbett's Cyclopaedic Survey of Chamber Music. Runs the gamut from formal analyses of musical works (including some of Hindemith) to brilliant disquisitions on such fundamental and perennial problems as The Meaning of Music, The Training of the Musical Imagination, and Words and Music." Library J

"If there is a danger in Tovey's works it might be that his brilliance as a conductor, composer, pianist, teacher, and writer sometimes blinds the onlooker—an object too brightly lighted may force one to close one's eyes. But we can understand merely from his 17 volumes of writings what those who knew him personally will always tell you: that he was more than an erudite and cultured scholar, more than a superb all-round musician; that he was a great man. That quality shines through on every page of this book." K. G. Roy

"Surely Tovey must annoy pedants. And his writing must trouble orthodox scholars in the same way that Beethoven's sonata movements trouble analysts of the textbook persuasion. Like Beethoven, Tovey is highly irregular. And perhaps the most irregular, and unforgivable, thing about his writing is that it reveals its author as an amateur, in the root meaning of the term. Tovey always wrote out of a profound love for music, and love, as E. M. Forster has said, is the only *raison d'être* for criticism at all. That emotion is rare among writers on musical subjects. It lies in the very heart of Tovey's writing." Lawrence Morton

TOYNBEE, ARNOLD JOSEPH. War and civilization; selected by Albert V. Fowler from A study of history [issued under the auspices of the Royal institute of international affairs]. 165p $2.50 Oxford

355.01 War. Militarism 50-9539

"The contents of this small volume have been extracted, by Mr. Albert Fowler, in consultation with the author, from the first six comparatively large volumes of a work that will probably run to nine volumes of this larger size when the rest of it is published. The extracts have been chosen to illustrate what the writer of A Study of History has to say about War. . . In studying the breakdowns of civilizations, the writer has indeed subscribed to the conclusion that War has proved to have been the proximate cause of the breakdown of every civilization which is known for certain to have broken down, in so far as it has been possible to analyze the nature of these breakdowns and to account for their occurrence." (Pref) No index.

A book concerned only with Toynbee's comments on the dangers of militarism seems a natural product of that school. Yet after rereading these pages which Mr. Fowler believes contain the core of the Toynbee warning, I am left wondering whether that warning is as clear-cut and impressive as this Philadelphia Quaker evidently thinks it is. . . This book will supply abundant material for long reflection and increasing apprehension as to where our civilization is headed. But I, for one, wonder whether its total impact is likely to be what the people at Pendle Hill expect." Paul Hutchinson

TRILLING, LIONEL. Liberal imagination; essays on literature and society. 303p $3.50 Viking

804 50-6914

Collection of essays in literary criticism. The subjects are diverse: writers; books; literary trends; art and neurosis; art and money; the relationship of literature to ideas; etc.

"I found these essays so rewarding, and I so greatly admire the whole bent of Trilling's work, that it is disagreeable to have to register a brace of complaints. Trilling repeatedly makes statements which betray that he is thinking of a small segment of the U.S. intelligentsia but which are certainly not phrased accordingly. . . There is, too, a certain lack of color in Trilling's prose which, considering his otherwise fine command of ways and means, suggests that he still, perhaps unconsciously, shares the liberal's overvaluation of utility at the expense of grace." TRINTERUD, LEONARD J. Forming of an American tradition, a re-examination of colonial Presbyterianism. 352p $6.50 Presbyterian bd.

285.173 Presbyterian church in the U.S.A.—History 49-4887

"[A study] of colonial Presbyterianism. . . The study is presented in two parts. In the nine chapters of Part I, Prof. Trinterud traces the several streams that flowed into the making of 'a new order, an American understanding of Presbyterianism.' . . In the seven chapters of Part II, the author tells how this American church understood and conducted its mission in the late colonial era, through the Revolutionary war, and in the years of crisis following that war." Christian Century

"The professional historian is likely to become somewhat skeptical about studies that profess to be 're-examinations' of this or that aspect of the religious past. He knows from experience that the re-examination is too likely to be only a presentation of the familiar in more or less new dress. Therefore it is refreshing to find such a study that really comes up to the promise of the title, as does Prof. Trinterud's study. Hereafter anyone who intends to say anything about colonial Presbyterianism will overlook this book only at the risk of having himself branded as ignorant." S. E. Mead

355.09 War 49-9756

"That 'sib-society and the Tables of Organization are almost antithetical' is the unhappy conclusion reached by Professor Turney-High after canvassing the literature on primitive warfare. He finds the conditions of true warfare, which are listed in detail—tactical operations, definite command and control, reduction of enemy resistance, clarity of motive, and adequate supply—quite rarely in primitive society. North American societies fail to qualify because of essential anarchy or democracy, Polynesian society is too concerned with the prestige drive, and only rarely do conquest states of Peru, Africa, and Asia approach true warfare. Must we then not agree with Swanton that war is not an original human institution, but the chronic disease of the state? Considering the importance of war to culture history, Turney-High sets out to organize the field. He has attempted to use only descriptive field literature, preferring reports of ethnographers to books by historians. Bibliography." Am Anthropol

"This is a subject which is ripe for anxious and searching inquiry by students of political philosophy and of the discontents of our present civilization, but not for legislation by international lawyers and politicians. The present volume professes to do no more than stimulate thought; and this it is well qualified to do. It only remains to add that the translations have been superlatively done, so that it is rarely possible to discern from internal evidence whether any particular contribution was originally written in French or in English; but there are a number of errors in the spelling of the proper names."

UNRUH, FRITZ VON. The saint; tr. by Willard R. Trask. 396p $3.50 Random house

Catherine of Siena, Saint—Fiction 50-14745

A novel based on the life of the fourteenth century saint, Catherine of Siena.

"This is an extraordinary novel. More European than American in its feeling, it will seem very strange to many American readers. But it rewards, as well as merits, careful consideration. . . To some, the expression of religious aspiration in terms of parallels drawn from human love will even be offensive. This hectic quality is accentuated by the author's method of telling his story." Edward Wagenknecht

"This flamboyant novel based on one of the most remarkable incidents in the life of St. Catherine of Siena, may be called a magnificent failure; and the paradox may be understood as a tribute to the writer. . . He has the fire of genius, but not Catherine's burning love. Lacking that, he cannot interpret the perfect fidelity, the exquisite union of natural genius and supernatural love which makes Catherine of Siena a vital force wherever her history is known." "The Catherine of 'The Saint' rings true. A sustained lyricism helps him vastly but his brain helps him even more. On the one hand he knows that the Christian mystic does not float about in confused sentimentality, that such a saint as Catherine thinks clearly, and can define as accurately as a mathematician the object of her love; he knows, on the other hand, something equally important to know; that the enemy of Christ thinks clearly too and can define the object of his hatred. . . Fritz von Unruh has found words adequate to the importance of what he has to say. The highest praise one can give him is to admit that, in places, not always of course, his book reminds one of Peguy's 'Mystery of the Charity of Joan of Arc.' " Gouverneur Paulding

914.15 National characteristics, Irish 50-8658

"Mr. Arland Ussher, a non-Catholic Irishman, confesses that this book is one more effort to explain the Irish to the English. . . In the first half he sketches the history of Ireland in his lifetime as seen from the shifting viewpoints of a man who has tried to clear his mind of youthful prejudices and impatience and to show events and men and women in the proper perspective. . . In its second half the book attempts the more ambitious task of explaining the inward make-up of the Irish Roman Catholic, his attitude to his religion, and its relation to his morals, manners, and actions, and to Irish social life. Rightly he gives much attention to the causes and effects of the delayed marriages of the Irish countryside, the Irish standard of chastity, and the theory and practice of the Irish censorship." Manchester Guardian

"These matters are discussed with such objectivity and detachment that 'The Face and Mind of Ireland' merits the respectful attention of all parties. This does not mean that the born Irishmen will always agree with Mr. Ussher. Most of them will disagree with his stand on partition. . . But no matter who reads it, or how much he fails to agree with the author at times, he should share the opinion of Dr. Oliver St. John Gogarty in his introduction where he calls 'The Face and Mind of Ireland' the 'most fair minded book on Ireland' he has ever read." Index to the bibliography.

"When a careful compiler brings together a good bibliography of an important field of history, historians everywhere have reason to rejoice; when he presents that bibliography in chronological order, historians should rejoice doubly, for then half their work is done for them and they can perceive the whole sweep of a movement by merely turning the leaves of another man's work. Mr. R. W. G. Vail, the scholarly director of the New-York Historical Society, has performed that service in The Voice of the Old Frontier. . . A surprising amount of new material, hardly known even to the specialist, may be found listed in Mr. Vail's bibliography. . . VALLENTIN, ANTONINA (MME JULIEN LUCHAIRE). H. G. Wells; prophet of our day; tr. by Daphne Woodward. 338p $4 Day

B or 92 Wells, Herbert George

A biography of this English man of letters, who died in 1946. Wells described himself in one of his last books. "I came up from the poor in a state of flaming rebellion, most blasphemous and unsaintly." This book, which is translated from the French, takes into account Wells's early poverty and its effect upon his after life. Incidents which refer to people still living are disguised as to names. Analyses of most of his writings are included. Bibliography. Index.

"From [Miss Vallentin's] pages one learns that there is a much larger autobiographical element in many of Wells' fictions than one would have supposed. Her weakness, on the other hand, is that her book is overweighed by a plethora of detail. Her study seems unpatterned. The facts are here, but their significance sometimes escapes. This circumstance does not always make for understanding. Worse, it does sometimes make for dullness." Edward Wagenknecht

There are large areas in his personal life which need to be explored to explain Wells the man, but which are forbidden ground to contemporary biographers. Until the full report can be made, however, Miss Vallentin's often shrewd biography will have to suffice. Her book is especially good in indicating Wells' almost incredible prophetic gift, his social consciousness and faith in man, his spirit of revolt, and in delineating much of his early life with its poverty and frustrations." "In identifying the film as a derivative of the nineteenth-century theatre, Vardac fails to account for its non-theatrical features. His attempts to relate the inherent documentary tendency of the medium to contemporary stage developments are highly artificial; nor does he succeed in settling the theatrical origin of slapstick. What allies the two media is clear; what separated them from the outset is omitted or obscured. Vardac's great merit is to shed light on the dark beginnings of the cinema and thus to dispel certain misunderstandings which have threaded our literature. As a first-hand exploration of pertinent nineteenth-century trends his book is an important contribution." Siegfried Kracauer

The present volume covers the second half of the same century, from Manet to Toulouse-Lautrec, whereas a third, on contemporary painting, from Matisse to the present day, has as yet appeared only in Italian and French. Here, as in his other books, the author's purpose is, as stated in an epilogue, 'to indicate . . . which of the works of each artist are perfect, and which are less than perfect, according to a judgment based on a norm which is not fixed once and for all and applied to every work and to every artist, but which is derived from a reconstruction of each artistic personality.'" "Venturi follows the method of criticism in this volume which has won him respect for his other work—'Painting and Painters,' 'Modern Painters.' It is a method too little used today, perhaps because it is easier to write in clichéd generalizations than to look with loving care and understanding directly at a work of art. Yet just for this insistence on 'looking,' such criticism has special value and it performs the dual functions, in Venturi's hands, of evaluation and elucidation. It is a kind of examination which is welcome now in this particular field where lately the emphasis has been on anecdote, theory, and personality rather than on individual artistic achievement." A. "To his task the author applies his vast knowledge, his unusual perceptiveness, and his gifts as a writer (the book is apparently translated from the Italian manuscript and this reviewer has no way of commenting upon its rendering into English). Yet, in spite of his unique qualifications, the author does not offer us here what we can rightfully expect from him. The succession of chapters devoted to a selected number of painters reads like a series of lectures and the comments on individual pictures sound indeed like explanations accompanying slide projections. The fact that all the illustrations, though following the sequence of the text, are grouped at the end of the volume, makes it rather awkward for the reader to follow Professor Venturi closely. . . In spite of all the foregoing, this reviewer wishes to stress the fact that he has a very high esteem for the author, for his scholarship, culture, and industry, and that he considers Professor Venturi's merits in the field of modern art to be of such magnitude that they will easily withstand this adverse report on his most recently published book." "Mr Vidal retails the legend of Blondel and his search for the captive King Richard, in exquisite prose; but the deceptive ingenuousness with which he deliberately includes all sorts of medieval horrors is not above suspicion. . . Mr. Vidal, like his troubadour, is here subtly singing a duet, and while much of the secondary part is obviously meant to provide parallels between the present age and the turbulent era of the Crusades, there is still an obbligato which carries tones of irony. And the irony is far from gentle, in spite of all the superbly polished phrases."

"The book is a trivial and pretentious thing which gives little evidence that the author has ability with words or images or rhythms. It is an elongated contrivance on which the writer has hung some inconsequential and condescending practice designs that are lacking in imagination and meaning. Aside from some brief descriptions A Search for the King indicates an almost complete absence of taste and talent. The dialogue is ludicrous, the background uncertain, the observations immature. This book does not add anything to Vidal's reputation; it is a dismal performance which is superficial in motivation, shoddy in execution." George Miles

"Not withstanding the fact that Mr. Vidal's descriptions are, at times, excellent, one never really gets the feel or flavor of the Middle Ages. This is, at least in part, due to Mr. Vidal's somewhat ambivalent attitude towards his story. On one page he writes seemingly with his tongue in his check, and on the next he seems to expect to be taken very seriously. . . Like many another writer, overawed by tradition, he seems reluctant to breathe life into the remote and statuesque figures of history." J. J. Maloney

320.1 Metternich-Winneburg, Clemens Lothar Wenzel, fürst von. Political science 49-10708

For descriptive note see Annual 1949.

"Professor Viereck's essay has two purposes. Its historical core is a revaluation of the policies and political philosophy of Metternich, disentangling from its reactionary phases the elements which were wisely conservative but not unprogressive. . . In fact, however, the reinstatement of Metternich among great European statesmen is incidental to Professor Viereck's main purpose, which is to show that conservatism provides a political faith or principle now needed to save civilization from fascism and communism. This part of his essay, its principal part, is puzzling or even perverse." G. H. Sabine

"Despite its inadequacies, Conservatism Revisited deserves to be widely read and no less widely discussed. Especially worthy of consideration is Viereck's statement, set forth in his foreword, that 'red-baiting of liberals, or fascist-baiting of conservatives, was once a stupidity. In 1949 it is a crime.' Hardly less worthy of consideration is his warning that freedom-loving conservatives and liberals must work together against an uncompromising police state that seeks to destroy both. One can only hope that Viereck's thoughtfully defined Conservative Man of the contemporary world does not prove to be as mythical as the Economic Man of Adam Smith and Karl Marx." Herman Ausubel

"This is a thought-provoking tract for a time when the extremes of reaction on the one hand and of revolutionary radicalism on the other threaten the mean of tolerance and moderation. First, the author reassesses the political theory of conservatism and rescues it from the contempt in which it is so often held. . . In order to give concrete illustration to theory, Mr. Viereck then proceeds to a wholly new, yet scholarly interpretation of Metternich, who appears here as a wise and farsighted statesman, a great admirer of the British constitution, and a true internationalist."

The expression he gives to the paradoxes of America (except in a poem like 'Hurrah for Karamazov!') is witty and often brilliantly illuminating. Perhaps the real trouble is that Viereck is not a lyric poet at all. . . Viereck's great gifts are in the realm of the didactic, the meditative and perhaps the pastoral. "This study attempts to explore the relation between the life of James Thomson and his work, and to present a balanced account of both. Miss Walker, according to her own statement, has considered the influences on, events in, and conditions of Thomson's life, his cast of mind and temperament, and his poetic and critical works equally as outgrowths and as evidence. Her method has led her to considerable revision of generally accepted opinions." (U S Quarterly Bkl) Bibliography. Index.

WALKER, ROY. Time is free; a study of Macbeth. 234p $2 Macmillan

822.33 Shakespeare, William—Macbeth [A50-669]

"The Time is Free is a counterpart of The Time is Out of Joint [London, 1948]. It is a study of Macbeth on the same lines as that discussion of Hamlet. . . What is attempted is an imaginative interpretation of the tragedy, mainly through its poetic symbolism in which is discerned purpose and pattern. . . This attempted interpretation of the poetic work of art is the main substance of the book, but I have again tried to correct and discipline my vision by discussing it in relation to the principal critical commentaries and the findings of devoted scholarship." (Introd) Bibliography.

"Although it is vastly exciting to follow Mr. Walker through his own imaginative reaction to 'Macbeth,' it is time and again disturbing to find it leading him into judgments which seem not only arbitrary but entirely irrelevant. . . His consistent recourse to 'subtle signs,' to 'undertones,' and to other kinds of esoteric symbols in order to get himself where plain sense would lead him seems perverse, and seems obtusely so when he identifies the Third Murderer as the evil spirit of Macbeth, embodied, but not in the body of Macbeth." H. B. Charlton

— **Manchester Guardian** p4 Ag 9 '49 130w

"Mr. Walker's exhaustive scene-by-scene examination of Macbeth is more concerned with understanding Shakespeare than with substantiating the critic's own theories and so escapes much of the tediousness that weakens some of his contemporaries. Moreover, and this is equally important, the author has a keen sense of dramatic structure and a sensitive understanding of the formal beauty of the play, so that he continually refers his conclusions to the test of dramatic fitness or function. . . The discovery of symbolic meanings in certain passages, to which his strong sense of pattern perhaps renders him susceptible, sometimes leads him on to debatable ground. . . Another weakness, which again derives from his peculiar strength, is his preoccupation with those echoes of Shakespeare's poetry, with which his mind is so deeply saturated. . . But the book is a genuine attempt at analysis and re-synthesis of one of the most important plays in the canon, and though it is unlikely that many of us will accept it without dispute, few of us will read it without reflexion." WALTARI, MIKA TOIMI. Adventurer; tr. by Naomi Walford [Eng title: Michael the Finn]. 377p $3.50 Putnam
50-9498

A picaresque novel of Europe during the first quarter of the 16th century. The hero-narrator is a Finn born in 1502 or 3. When his grandparents are slain by the Jutes six years later he is taken in charge by the witch-woman Pirjo. Educated by priests, avid for learning, he finds his way to Paris and after many hardships wins a degree. Thereafter he wanders over Europe, embroiled in its political turmoil, suffering personal tragedy, meeting with the great men of the day.

"Particularly irritating is his whining self-justification for each new crime. This is a trait which Michael shares with the entire cast; all men from bishops to burghers are pompous cheats, all women are whores. Because he heavy-handedly tars everyone with the same brush, the unskillful author does not even obtain a vivid portrayal of a rogue but merely a drab dun-on-dun picture." Mary Sandrock
— **Cath World** 172:153 N '50 210w

"One passage in the book, relating the trial and torture of a German woman accused of witchcraft by the Inquisition, is strikingly and memorably done. For the rest of it, the book hits a new low in historical fiction." Kelsey Guilfoil
— + **Chicago Sunday Tribune** p2 S 24 '50 400w

"Michael never emerges as a consistent person, being wholly subject to the exigencies of the plot. But he does on occasion reflect the mental confusions of the time: the nagging religious doubts, fear of heresy, superstition, awe, and impatient common sense. As a rounded picture of the period, 'The Adventurer' is perhaps less successful than 'The Egyptian.' . . But there is real—if highly colored—life being lived in the inns and narrow streets." For 'The Adventurer' contains a great deal more than excellent and dramatic action, battles and cruelty. Mr. Waltari entertains, but he has a deeper purpose. His book is deliberately disquieting." Gouverneur Paulding
+ **N Y Herald Tribune Bk R** p6 S 24 '50 900w

"'The Adventurer' is, it seems to me, a better book than was its predecessor. In both there is a good deal of vivid writing and some bogus. Yet the bogus is less plentiful in the new book and the vivid writing is more pertinent and more penetrating. The whole episode of Barbara, the witch wife, and of her burning is great—or close to it. The description of the sack of Rome is able war corresponding. And the portrayals of such very different characters as Charles V, Martin Luther and Dr. Paracelsus are superb." T. C. Chubb
+ **N Y Times** p9 S 24 '50 700w

"'The Adventurer' follows the tradition of the classic picaresque novel. In its 'hero,' the youthful Finn Michael Furfoot, there is a little of Tom Jones, a great deal of Tyl Eulenspiegel, plus a substantial measure of Candide and Zadig. The blend is concocted with authority and the resultant narrative, though it flags occasionally, offers bawdy, witty, biting entertainment with now and again a touch of horror. Waltari is an able satirist. With a broad and open hand, and certainly with awareness of what he is doing, he shakes together elements of scholarship, farce, melodrama, and high comedy." WARNER, REX. Men of stones; a melodrama. 219p $2.75 Lippincott

50-5447

An allegory for the times in the form of a novel. In his effort to demonstrate his apprehensions about the effects of uncontrolled authority the author pictures the life in a political prison in an unnamed country. To this ideally situated island fortress comes Mr Goat, a member of a cultural mission, who is to stage King Lear for the inmates. The governor of the prison is a madman and a genius, who has set himself up as a god and is worshipped by his prisoner-subjects. The novel ends on the night of the performance, when two types of authority clash and one vanishes completely.

"Men of Stones, I'm afraid, left me with awkwardly mixed feelings. The novel's theme is arresting, its conception audacious, and it has stretches of brilliant argument, an undercurrent of excitement, and a powerfully suggested atmosphere of the bizarre. But the book is seriously flawed. High expectations are aroused in the first encounters with the Governor; then Warner loosens his grip by introducing, at mid-point, a considerable subplot centering on Marcus. And thereafter the book tends to become diffuse. . . Granted this weakness, Men of Stones remains one of the more interesting of the recent novels." C. J. Rolo

"'Men of Stones' is brilliant, witty and ice cold. Its debate is agonizing because it is vital. It is in, of, and for our age; its presentation, in symbols of the crisis of our time is almost algebraically stylish. And its only passion is the cold fear that its warning may be already too late. Personally I preferred the argument to the story, the pill to the jam, but if Mr. Warner were to plead that a modern audience will not swallow mind-stuff unless it is either delivered by an 'authority' or embedded in what looks to be fiction, I would accept his excuse as readily as I recommend 'Men of Stone' to those who (in Chesterton's phrase) want to read a book rather than a book to read." "These people, indeed, are neither human nor effective as symbols, and the whole story simply misses fire. A critic as well as novelist, Rex Warner has gone a long way since he wrote the fresh and often amusing 'The Wild Goose Chase,' in 1937. But I fear that at times —and this is one of them—he travels in the wrong direction. This is a pity, for he is a writer of talent." H. F. West

"What Mr. Warner is prophesying for a world that doesn't seem to want to mend its ways is clear enough, as well as thoroughly disheartening, but his admonitions are often drowned out by the uproar caused by all those carefully contrived and beautifully presented sound effects."

"However you take it, this book remains a powerful parable, a finely written fantasy-melodrama in which there is clearly delivered one more warning to mankind to awake before it is too late. "All sorts of problems of authority in the modern State, of morality, faith and the like are clearly very much in Mr. Warner's mind; for a large part of the time, indeed, this is yet another novel by an intellectual meditating upon the corruption of power that leans heavily upon Dostoevsky's Legend of the Grand Inquisitor. The trouble is that Mr. Warner fails in dramatic point and coherence. His characters are mere sticks, neither human beings nor effective symbols. And his prose, though careful and measured, has altogether too little life." R. D. Charques

50-7242

A reconstruction of a famous nineteenth-century murder case. Jeremiah Beaumont, Kentucky lawyer, had an "obligation" to kill Colonel Cassius Fort, politician. This novel describes that obligation, the murder, the trial that followed, and Jeremiah's escape.

"The detail which Warren lavishes on some of his secondary personages gives the book vividness and breadth as a tapestry of the period; but it has its drawbacks in a novel that goes far beyond being a period piece. I found the regional historian intruding on the artist, who interested me much more; and the author's diffusiveness puts a slight damper on the reader's emotions. This is my one reservation about Mr. Warren's fine, superbly written novel." C. J. Rolo

It underlines, in grim and forceful fashion, man's ultimate isolation from his fellows, his stark aloneness on this teeming planet. The author's work is marred only when he is not content to let the reader draw his own morals, and injects into the scene a didactic aside, as when he observes that the savagery of dueling, condemned now as folly, is no worse folly than the international dueling of war." "After a century during which the Kentucky Tragedy was nearly forgotten, Robert Penn Warren has made a fresh study of the surviving documents and of the war between Relief and Anti-Relief. Changing the names of the principal actors, but giving what seems to be a truer picture of their personalities than any of the writers who preceded him, and staying pretty close to the facts except for a surprising departure from history at the end, he has written the longest and richest of his novels. . . I hope he continues digging, and yet I also hope that in his next book he concentrates on a single story, as he did so well in 'Night Rider.' His present book is longer, richer, subtler and its only serious fault is that it uses too many of the subjects and tries to combine four novels in one." Malcolm Cowley

"A torrential, bloody and profound book. . . The book has faults. Perhaps the gravest is that Mr. Warren does not like his hero, or even pity him. . . To too large an extent the book celebrates—not Jeremiah's mistakes and errors—but the retribution which he must make for them. Another fault grows out of the first, and this too is a fault of emphasis. Jeremiah looms too large in the book. . . Whatever its faults, this is a book such as we seldom see, a book written at the full strength of his power by a writer who has great talents, and possibly more. If it is a clumsier book than 'All the King's Men,' it is a wiser and more profound book too. Mr. Warren is still growing, still reaching for more to know and set down. "'World Enough and Time' is ominously full of rhetoric. It is also spiked with such questions as 'What is justice?' and 'What is truth?'—philosophical sockdolagers to which, unlike jesting Pilate, the author devotes a total of five hundred and twelve pages searching for answers, and then, not wholly to our surprise, ends with the ancient interrogatory feint 'Was all for naught?' Whether the search was for naught or not, people who crave historical novels as other people crave chocolate bonbons will be delighted by 'World Enough and Time.' They will not ask why Mr. Warren has seen fit to write it. They will even forgive him his brambly rhetoric and big questions, skirting them to reach the rich bottom lands of bastardy, bloodshed, decayed gentility, and disputation in pioneer dialect thick as b'ar fat." "The consequence of [Mr. Warren's] approach is that his book lacks immediacy. We see his characters dusty across the long field of time. . . If his is not a distinguished novel, it is a distinguished book, an arresting and provocative book, a wise book, a masculine book, a book of immense and mature disillusion. A keen and stout mind is at work here, telling us things we haven't known till now, telling us things we've known but haven't dared to believe. This is more a philosophical than a romantic work. "It is a fascinating story. If it has any weak spots, they occur in the span between the young man's decision to commit the deed and its consummation. This is natural, for Warren is more interested in the situation of his characters than in the characters themselves, more interested in life than in those who live it, and therefore more at ease in unravelling the skein of circumstance than in knotting it. He is writing better than ever, with a sustained eloquence and a richness of language that are constantly invigorating. No one, not even Faulkner, can surpass him when he writes the speech of country people. WAUGH, EVELYN. Helena. 247p $2.75 Little

Helena, Saint—Fiction

A historical novel based on the life of St Helena, the mother of the Emperor Constantine. In her old age Helena is supposed to have made a pilgrimage to Palestine and there discovered the relics of the True Cross.

"Helena should not, I think, be approached as a novel (it is too cluttered with history and slight in characterization to be an impressive novel), but as a fictionalized history or reworking of a legend. From this standpoint Waugh has done his job with fine artistry. I confess, though, that Waugh is one case in which I prefer to see an author stick to his rut. He is incomparably at his best in the audacious harlequinade, and that best is nothing short of comic genius." C. J. Rolo

"Admirers of Waugh's satiric facility will find here, particularly in the rendering of the decaying high society around Helena, passages to remind them of, say, 'Vile Bodies' or 'Decline and Fall.' But, in its distinctively Christian affirmation, this novel seems closer to 'Brideshead Revisited' than to any other of the author's works. Yet, like all the others, it may be read on two levels of appreciation: As bright entertainment, or as deceptively profound commentary. On both levels it's a superlatively well done book." Mr. Waugh's Helena is not a convincing character, at least to this reviewer. To be sure, Mr. Waugh tells us that this is a legend. Its primary objective is to make evident how man through a series of free efforts can become more complete and thereby more human. "The Theory of Literature is a brilliant Poetics of the twentieth century. It details the peculiar 'mode of existence' of a work of art as it has been understood by working critics of the last twenty-five years. The descriptions themselves vary in length from two or three lines . . . to over half page. They are concise, giving the family to which the animal belongs, its size, color, and habitat. Some of the more detailed descriptions contain information on historical development, foods, weight, and distinctive coloring in the male and female. . . "Professor Werkmeister has written, for the most part, a careful and erudite history. . . However, there are two criticisms which must be urged against an otherwise excellent history. "A many-sided saga, 125 years of an industrial family, roughly suggested by (but not historical re-creation of) the Duponts. The development from small beginnings of powder company to gigantic enterprise, multifarious in its financial and commercial transactions; the growth of a small, closely-knit Quaker family to a sprawling tribe, each fighting for place and power; the corroding influence of wealth and power in dissolving the high principles of earlier generations, all work toward producing one devoid of moral principle." WERTHAM, FREDERIC. Show of violence. 279p $3 Doubleday

364.38 Murder. Criminal psychology 49-8713

For descriptive note see Annual for 1949.

"Murder in the United States is both a pressing social problem and a subject made fascinating by its very horror. In this book Dr. Wertham has collected a number of the most interesting murders with which he has been concerned as a practising psychiatrist. The author's accounts of these crimes embody two major themes: first, the factors which induced the 'show of violence' by the killer; second, the treatment (or lack of treatment) accorded offenders by the psychiatric profession. On the first score, Dr. Wertham furnishes clinical data in a wealth of detail rarely made available to the lay reader. . . The second theme running through Dr. Wertham's book, the quality of psychiatric treatment accorded offenders and potential offenders, is well calculated to disturb the reader."

WEST, ANTHONY. The vintage [Eng title: On a dark night]. 310p $3 Houghton
50-5012

"Wallis, central character of Mr. Anthony West's novel, is a British lawyer who has committed suicide after taking part in the trial of war criminals. In eternity he finds himself linked with General von Kenelm, the man he has helped to condemn. The book describes Wallis's experiences in the early stages of his arrival in the next world, and in doing so it recapitulates his career, with that of Kenelm, and, to some extent, others who have played a part in Wallis's life on earth. The lesson that the author seeks to convey is that hell is made up merely of human falsehoods and evasions; and that heaven may be gained by the acceptance of moral responsibility." He is sympathetic to protest and agitation where the motives seem worthy; unsympathetic to some manifestations of disloyalty that have excited the support of a good many students. He is, in short, usually on the side of the angels. . . There are a few slips in dealing with the disloyalty of the middle period, slips not of fact but of interpretation, and they are worth noting, for they involve important issues. . . This

WHITE, ANTONIA. Lost traveller. 312p $3 Viking
50-6924

The lost traveller is Clara Batchelor, the young daughter of an English school master, a convert to Catholicism. During her childhood and adolescence Clara was devoted to her father, and regarded her mother as a nonentity. After graduation from school Clara took charge of the young son of a titled family. A terrible accident ended that experience. On the eve of her marriage Clara at last learned the true worth of her mother. The scene is mainly London in 1914 and the early years of World war I.

In this "little scrap-book of a nostalgic Tory" the author of The Sword in the Stone (Book Review Digest 1939) pictures the life and times of eighteenth century England, with some excursions to the Continent. He describes events, many of them scandalous, in the lives of Horace Walpole, Lord Hervey, George II, the Marquis de Sade, and many others. Includes many excerpts from contemporary writings. Illustrations from contemporary prints. No index.

"There has been much scouring in out of the way places for curious odds and ends, but the letters of Horace Walpole, and Boswell's Johnson supply a large part of the material, which, if not invariably amusing, is at least interesting. But one gets a little tired of some of the items dished up." Theodore Maynard

"The chapter on Admiral Byng is distinctly superior to the rest of the book, the greater part of which is quite unworthy of Mr. White's proved abilities. In the past he has shown himself a writer of originality and charm. Some of his novels and fantasies were delightful exercises in a new field. But The Age of Scandal displays no genuine understanding of the eighteenth century, or of the men and women who made it a memorable chapter in the history of English civilization; and it can only be hoped that its compiler will soon return to the kind of work which formerly gave so much enjoyment to his readers."

"It is not a biography in the usual sense of the word, for the author is little concerned with the intimate personal life of the man or his relations with family and friends. WHITMAN, MRS SARAH HELEN (POWER). Edgar Poe and his critics; with an introd. and notes by Oral Sumner Coad. 105p $3 Rutgers univ. press

B or 92 Poe, Edgar Allan 49-48865

"Sarah Helen Whitman was a well-educated widow in Providence, Rhode Island, who was engaged to Poe in the last years of his life, after his wife's death. The engagement was contingent on his abstention from liquor, and when he turned up one day the worse for wear, Mrs Whitman broke it off. But after his death, when his reputation had been blackened by Rufus Wilmot Griswold and others, she came to his rescue in a little book that is notable for its insight into his character, for its appreciation of his art, and for its grasp of his ideas and their implications." (New Yorker) This is a reissue of Mrs Whitman's book.

"Her essay was well worth reprinting. It still stands up, curiously enough, as one of the best things written about Poe. It has been ably presented here, with an introduction and notes by Mr. Oral Sumner Coad—though one would like to have had a few more particulars about Mrs. Whitman's life."

"Who's Who in America has been published biennially since 1899, with the exception of the three years, 1903-1905, covered by volume 3. The present edition is the largest to date. The publishers have announced that there is a total of 46,729 sketches, 9615 of which have appeared in no other edition. This total is an increase of 5535 entries over the previous edition. . . Who's Who in America takes the world as its field, with greatest emphasis on the people in the United States. . . The sketches generally include occupation, place and date of birth, parentage, education, marriage, children, positions held, organization and club membership, books published, and postal address. They vary in length from two lines, where presumably no details have been supplied, to half a column or more. Length of article is not necessarily a guide to the importance of the biographee, but rather to the variety of his activities. The biographies are written in the usual concise, condensed biographical dictionary style." Subscription Bk Bul

WIENER, NORBERT. Human use of human beings; cybernetics and society. 241p $3 Houghton

501 Communication and traffic 50-4542

"Two years ago Norbert Wiener, Professor of Mathematics at the Massachusetts Institute of Technology, published his widely discussed 'Cybernetics' [Book Review Digest 1948, 1949]. Cybernetics might be defined as the study of the striking similarities between the human brain and calculating machines. . . Many interesting developments have taken place in cybernetics since 1948 and Dr. Wiener's latest book brings the subject up to date and emphasizes social implications as well as technical advances." "Dr. Wiener is nothing if not a modern Jeremiah lashing the sins of a society he dearly loves. It is hardly possible to read him without disagreeing with him at one point or another; it is hardly possible to read him without being startled to furious and fruitful thinking, moved to deep and reverberating emotion. He is a Jeremiah with the taste and learning of a Renaissance humanist, the free-ranging intellectual gusto of a William James. He is a mathematician who sees red when he finds men reduced to soulless digits, a machine-maker who rebels against treating men as machines." Robert Pick

Like Lancelot Hogben, with whom he may be not unfavorably compared, Dr. Wiener sometimes uses an impressive exposition of scientific knowledge as a jumping-off point for the expression of essentially personal prejudices. Most of the prejudices are amiable, but those who disagree could show in a number of cases that the points are asserted rather than proved." C. E. Noyes

The author of 'Clio a Muse' would not only approve Professor Willcox's interpretations of British history; he would also applaud his mastery of the art of written history. For this is not a series of essays and reflections on history, not an attempt to discern sociological laws in history. Somehow Professor Willcox has contrived to have things happen in his book; his history is still story. With the underlying assumption of this book those less devoted to the English tradition of historical writing may well differ. WILLIAMS, ERIC ERNEST. Wooden horse. 255p $2.75 Harper
940.547243 World war, 1939-1945—Prisoners and prisons, German 50-5116

Three British prisoners of war devise and carry out a novel method of escape. They build a wooden vaulting horse which is carried out daily into the exercise ground by their fellow prisoners. While the planners are digging a tunnel under the horse, their friends vault back and forth over it, to hide their activities from the German guards. The ruse works, and the three escape, via Denmark and Sweden, and reach England safely.

The attempt to create objective characters out of the two escapers, the forcing of so much pure information into dialogue, has left an occasional feeling of strain in the book. However, that is a purely literary criticism, and it is perhaps unfair to labour it in reference to a book which does not have a primarily literary appeal. The important thing about The Wooden Horse is that in it Mr. Williams tells one of the most spectacular adventure stories of modern times."

973.73 U.S.—History—Civil war (49-11530)
For descriptive note see Annual for 1949.

"Having attained the rank of colonel, with a fine background of army service, Professor Williams shows special competence as to technical military matters—e.g., 'strength returns' and logistics. His treatment flows along with clear style, impressive detail, vigorous exposition, and well-ordered chapters. Controversies, sharp contradictions of other authors, and special problems are relegated to appendix pages. Maps and illustrations enliven the book; chapter titles are vivid; continuity is well sustained. . . Along with other matters, Antietam is set down as McClellan's 'failure' (1, 105, and chap. xiv). Lincoln did not consider it so. . . The author's favorable appraisal of Stanton's war department and of McClellan's opponents is not shared by certain competent writers. . . There are occasional errors. . . Despite such matters, reluctantly mentioned, Lincoln Finds a General will win wide recognition as a significant contribution to military history. In our time it has been remarked that points of dispute 'will be debated as long as Guadalcanal is remembered.' It is so with the Civil War." J. G. Randall

"Unfortunately, a tone of petulance frequently mars the book. Severe toward mistakes in minutiae by other writers, Mr. Williams is himself guilty of such minor errors as consistently misspelling Centreville, and referring to Confederate generals getting their third or fourth star. . . The general deficiencies of the work lie in evaluation and interpretation of the large amount of historical data presented, and the frequency with which Mr. Williams states pontifically what a general 'should' have done often becomes amusing."

The sketch maps, despite the merit of simplicity, will not satisfy the serious military student, who will find more useful the maps accompanying Ropes's volumes and the excellent sketches provided by Dr. Freeman in his 'Lieutenants.' Bibliography and index are satisfactory; documentation admirably reinforces the scholarly presentation of facts and conclusions." C. W. Elliott

No account is taken of the changed outlook in thought noted in the American Catholic Sociological Review. . . If the reader will bear these small deficiencies in mind, then Williams' work may indeed be recommended as the only existing summary of Catholic social thought which thus far has appeared in English, one which calls attention to the fact that there have been many Catholics whose work has been somewhat neglected, and which also gives

974.3 Vermont—History 49-2275

"The commercial dependence upon the St. Lawrence waterway of western Vermont, where the dominant founding fathers of that state mostly lived, and the influence of this dependence upon the course of Vermont history are the major themes of this volume. Beginning with the New Hampshire grants in the 1760's the story ends in the 1820's when the Champlain Canal effectively diverted the trade of western Vermont from the St. Lawrence to the Hudson. The 'quandary' of Vermont was implicit in the efforts of its people 'to reconcile their political affiliations with their commercial connections.' " Am Hist R

He knows his man and his man's family, for there is much about the father, the brother, and the son; and he knows the British Navy of Hawkins's day, not only its ships but its administration and management and what today are known as logistics. There are several pertinent illustrations." Sat R of Lit

"Hawkins of Plymouth, although it cannot compare with the same author's Age of Drake, is based on the most thorough research and is always readable. It covers the whole of the sixteenth century, since Dr. Williamson deals not only with the career of Sir John Hawkins, but with his father, brother and son. The chapters on the expedition to San Juan de Ulua and on the defeat of the Armada are first-class pieces of historical writing. . . Nevertheless, the book is far from satisfactory. As a study of a family or of a man it is lifeless. Hawkins emerges from it as an honourable public servant . . . and as a captain with an unusual regard for the living conditions of his crew; but he becomes a human being only when we look at the five portraits that are printed with the text." WILSON, GERTRUDE, and RYLAND, GLADYS. Social group work practice; the creative use of the social process [under the editorship of Marion Hathway]. 687p $5 Houghton
361.8 Groups (sociology) 49-11016

"This book describes the knowledge and skill that the social worker needs to acquire in order to make creative use of the social process in groups." (Pref) "The first half is devoted to a discussion of social group-work methods and analysis of group processes and program media. The second half (a) presents and analyzes case data, excerpts, or entire case histories of groups, accompanied by penetrating comments and pertinent study questions; and (b) it analyzes the supervisory and administrative processes." (Am J Soc) Bibliography. Index.

"All persons and organizations interested in group work will find this a very stimulating text whose authors have a broad perspective, sound philosophy, and eminent ability to utilize materials from a variety of fields—sociology, social psychology, psychiatry, cultural anthropology, and the general field of social work. The fifty-page Bibliography, though it is not annotated and the authors are not listed in the index, is second to none. It is comprehensive and ingeniously organized, and the references are aptly chosen. . . This volume differs from others in the same field by (1) its clear thinking and analysis of the nature of group dynamics, of the interacting processes of group life, persons, social institutions, and cultural patterns; (2) by effective presentation of well-selected and well-analyzed case data; and (3) by the fact that, although the volume can hardly claim to be basic research in the field, it is research-oriented and motivated, which in itself is a logical steppingstone into much needed research. The volume throughout sustains the interest of the reader because of its stimulating discussion and profusion of helpful practical suggestions." P. V. Young

"Miss Wilson's book will be of interest chiefly to specialists. "The value of the book lies not in any fresh 'contribution,' but rather in the fact that Miss Winwar has submitted the whole body of existing evidence to a close, intelligent scrutiny, and has set forth her findings in terms which the reading public of 1950 will find congenial. On the biografical side, 'The Immortal Lovers' contains almost everything anybody will want to know about the Brownings. It is only fair to add that the book has the defects of its qualities." Edward Wagenknecht

"From the many sources on which she has drawn, Frances Winwar has constructed a sympathetic and readable biography, which, since it combines the life and work of both of the Brownings, should prove valuable to students. Those familiar with Browning material will, however, find nothing new in this rather conventional presentation, while the average reader may wish that less space had been given to an analysis and discussion of the poems, which seem somewhat dated." C. B. Burnett
Christian Science Monitor p7 Jl 15 '50 700w

"The Browning story is ever old and new, one of the great love stories of literary history, and Frances Winwar has brought to her rendering of the story, full measure not only of her thorough knowledge of the setting, the period, the atmosphere of the times, but flavorful, zestful appreciation of the glamour. Her style, with its lushness, its occasional sentimentality, seems somehow keyed to the story she is telling. And yet, despite these qualities which will annoy some readers, her manner of telling is somehow in tune with the matter."

"There are numerous inaccuracies. But Miss Winwar's title stresses the fact that she is telling a love story, and perhaps it is unfair to ask her to do more. The world has held more marriages which were both successful and civilized than a hasty reading of current fiction might lead one to believe. But it has rarely held one like the Brownings." DeLancey Ferguson

"Easy and warmhearted though it is, this biography is removed from the status of art by a noticeable failure in architectonics. . . The multitudinous materials dictate Miss Winwar's directions. That prerequisite of any art goes. . . In the end, Irving Stone's recommendation of the book 'to everyone interested in poetry, love and great human stories' inform, that its materials be pre-understood and pre-dominated, is here virtually ignored, so that too often one gets the impression that a given chapter is being thought out as it dicates the only area, artistically speaking, in which this biography should be taken." 325.12 Jews—Migrations 49-10451

"This detailed historical study traces the nineteenth and twentieth-century migrations of several millions of Jews from Europe to the far corners of the world. . . In the author's estimation, the primary reason for the mass migrations was political, the second was economic—the want which usually accompanies political oppression—and finally there was an ideological motive, especially, of course, for the flights to Palestine." U S Quarterly Bkl

"A scholarly report. . . That the book is deeply scholarly is a real achievement if one considers the highly controversial character of the topic. There are some small if's and but's; for instance, Hungarian anti-Semitism prior to the 1930's should not be belittled. However, it is more important to note that the story requires the filling-in of details at many points. This could not have been done in such a comprehensive work as Wischnitzer's; it must await monographic studies where the details could be told not so much from the point of view of organization as from the point of view of the individuals involved." Though Weitling's own program is clearly summarized and his personal contacts with other socialists duly recorded, the bare statement that his 'system clearly shows the influence of Saint-Simon, Owen, Fourier, and others' (p. 68) might have been profitably expanded into a discussion of precisely what ideas Weitling derived from each of these predecessors, and what new slant he gave by his particular method of selecting and combining them." With the ambushing of K Company in which Stoddard is caught and from which he alone escapes, Harris agrees to cover up for the Colonel in his official report in exchange for Stoddard's transfer to Paris. Assembly at Paris on December 10, 1948." (Canadian Forum) No index.

"Professor Wood's interpretation of toleration, in which he insists that it is the primary obligation for Christians in their dealings with other faiths, is not convincing. . . One can agree with Professor Wood that in a modern secular state no faith has a right to claim for itself what it is not prepared to grant to others, providing good morals (whatever that may mean) are safeguarded, but this limits toleration almost entirely to those who are of the Judaeo-Christian tradition from whence our good morals derive in the Western World. WOODBURY, DAVID OAKES. Measure for greatness; a short biography of Edward Weston. 230p il $4 McGraw

B or 92 Weston, Edward 49-49451

A biography of Edward Weston, English inventor, who came to the United States in 1870 at the age of twenty. His achievements in the field of electricity "included electroplating, building of battery cells, dynamos, electric motors, a system of electric power transmission and control, all of which resulted in giving to man 'the most valuable product on earth—electric power.' He pioneered in plastics. When Edison was combing the world for a substance that would give him a carbon fibrous filament for his electric light bulb, Weston brought out his plastic filament (tamidine) which would burn for 2,000 hours, compared to 40 hours for Edison's filament. Weston is best known, however, for introducing a number of accurate electrical measurements." (Am Hist R) He became a citizen of the United States in 1923 and died in 1936. Index.

"The third volume of Virginia Woolf's miscellaneous essays (which include many not before published) that her husband, Leonard Woolf, has brought out since her death. It is the usual mixture of literary sketches, reflections on general subjects, and short flights of descriptive writing. The most interesting items are probably the piece that gives its title to the volume, which deals with Captain Marryat, the once popular writer of sea stories; a memoir of her father, the historian and critic Leslie Stephen, rather disappointingly brief; an essay on the modern Walter Raleigh, a sort of companion piece to her sketch of Edmund Gosse in one of the earlier volumes; . . . her wellknown manifesto-essay, first published in pamphlet form, 'Mr. Bennett and Mrs. Brown,' in which she repudiated the aims of the older generation of novelists and attempted to define her own; an amusing trick piece called 'Flying Over London,' . . . and 'Memories of a Working Women's Guild,' one of her curious constrained attempts to make connections with a working-class public, which combine in such a jarring way a will to aid the processes of democracy with a sharp, never-relenting class-consciousness." And she never became the indolent 'prose-charmer'; breaths of the vernacular float in from time to time, and the effect of these gusts are always finely judged. Writing thus by rule and by ear, Mrs. Woolf never allowed herself to become awkward, rough, or truly baffling or bizarre, as many of her more original contemporaries dared to be. . . "Perhaps because he attempts to tell so much in such a short compass, the author tends to make sweeping, generalized statements and frequently fails to disclose the basis for his conclusions. Thus, where the subject matter is more easily recognized as controversial, as in the sections on recent American history and international law, many readers will find themselves in disagreement with the author's views. Nevertheless, since the book is written in a clear and readable style, it will be useful to anyone who wants a quick and very broad survey of legal thought and institutions."

But the lawyer-popularizer, just because he addresses a necessarily uncritical audience, should take elaborate pains not to mislead, never stating what is doubtful as if it were indubitable. Since this author has not taken such pains, I hesitate to recommend his book, for fear that it will give his readers seriously false impressions. . . We badly need a book—I think that only a group of writers could write it—which will do what Mr. Wormser set out to do. WORNUM, MIRIAM. Portrait in the dark. 213p $2.75 McGraw
50-14560

"Out of the overnight state of mind of a woman newly widowed comes the whole material of this novel. It is a prolonged mood, a focused remembrance of things past and a dreaming of the future. The 'Portrait' begins moments after the husband has died. The widow faces a crucial phase in her own maturity, though not the first one. . . As she feels through her past, she looks also into her future with seemingly prophetic clarity. Out of this mood comes a decision for herself—and a solution. In the indication of the real color of the future reality she faces, there is much dramatic irony." San Francisco Chronicle

"In so lively and individualistic a collection, contradictions and occasional over-emphasis are inevitable. They do not matter, nor do minor slips like the apparent omission of 'no' in an argument on page 168. But the charges against the 'British' universities of the eighteenth century are surely only valid if applied to the English universities." D. W. Brogan

YERBY, FRANK GARVIN. Floodtide. 342p $3 Dial press 50-9227

Natchez in the 1850's is the scene of this novel. The hero, Ross Pary, was born "under-the-hill," but his ambition was to live with the aristocrats "on-the-hill." He came back from Europe, where he received his education, armed with degrees and the ability to become an architect, and he realized his ambition to be received by the upper classes. But the three women who loved or hated him were the dominating factors in all his after life.

Chicago Sun p6 S 5 '50 130w

"Yerby sets the stage for the embittered controversy that was to erupt a few years later in the Civil war. His characters are vividly drawn and, despite a slight complexity of plot, the story moves along rapidly under its own momentum. But the story lacks the feeling of realism the author displayed in 'The Foxes of Harrow,' or 'Pride's Castle.' It seems as tho a little too much happens to one man and that, somehow or other, it just couldn't happen." William Yates

Chicago Sunday Tribune p5 Ag 27 '50 420w

"The novel is supercharged with action, the writing is tempestuous. Its fault is immoderation—characters more than life size, for good or ill; cruelty underscored, violence monotonous, scenes of passion overtorrid. The autobiography of the author of Hungry Hearts, describing her spiritual hegira from the poverty of New York's lower East Side, to the fleshpots of Hollywood, and back again to her own heritage.

"The implications of the story are of far greater value than the surface narrative, for Miss Yezierska's reminiscences have the naïve, breathless, emotional qualities of a youthful confiding of intimacies, often rendered unpersuasive here by a sort of artful artlessness and by a tinge of exaggeration and acerbity. The narrator and central character of this novel is a beautiful, wealthy widow, with a cruel, predatory streak which is the motivating factor of her whole being. She describes in detail her pursuit of a man ten years her junior, and her love affair with him, ending in his suicide.

"This upper echelon hokum is told in the first person by the widow as a recital to her dead lover. There is evidence that the author has read Kafka; characters are nameless, the background is not identified. Though nameless, the widow is recognizable as a comical cross between Theda Bara and a gullible freshman suffering from overexposure to Baudelaire, Picasso, Huxley and Thomas Mann. 362.4 Blindness 50-7188

"Under the auspices of the Veterans Administration, a group of experts have written the chapters which make up this book. An almost total picture is given of the problems and means of the blind's adjustment. Education at home and at school, vocational rehabilitation, and the blinded veteran are among many phases discussed." Library J

"Especially informative is the description of current laboratory endeavors to provide mechanical substitutes for the sense of vision. . . The material on mechanical and sensory devices to aid the blind is the best available. . . Problems of the psychology and personal adjustment of the blind are not neglected. Only partially treated, however, are the industrial potentialities of the blind, a matter whose importance is secondary only to the prevention of blindness itself. Little is said as to pensions or compensation measures for loss of sight. Furthermore, prevention—really the sole 'solution'—receives far less consideration than it deserves." Harry Best

974.6 Connecticut—History 49-10020

"In thirteen chapters supported by elaborate footnotes the history of various controversies is related with emphasis upon such issues as religion, western expansion, and imperial connections. Thus, the impact on the freemen of the growth throughout the colony of religious heterodoxy and of the rise of Anglicanism, particularly in western Connecticut, is stressed, as is that of the activities of the Susquehanna Company in seeking to appropriate the northern part of Pennsylvania. Intertwined with controversies over these issues and merging finally as the most controversial of them all is the issue involving the relations of Connecticut under the charter of 1662 with the government of Great Britain. . . The volume is concerned primarily with the history of controversy within Connecticut between Connecticut groups during the twenty-five years preceding the Declaration of Independence." Another merit lies in Mr. Zeichner's recognition that party alignment was not black and white, that there were many 'gray sheep' ranging between the extreme revolutionary radicals and the most bigoted loyalists. Painstaking research is apparent in the notes and the bibliography which together comprise one-third of the bulk of the book. The bibliography, moreover, is no mere list of manuscript collections, books and other sources, but a critical essay that will stimulate the reader to further study."

Moreover, we shall attempt to demonstrate that the structure and organization of an individual's entire being will tend always to be such that his entire behavior will be governed by this Principle. . . In simple terms, the Principle of Least Effort means, for example, that a person in solving his immediate problems will view these against the background of his probable future problems, as estimated by himself. Moreover he will strive to solve his problems in such a way as to minimize the total work that he must expend in solving both his immediate problems and his probable future problems." Understandably, the authors are prone to over-estimate the importance of the Forty-Eighters; but by limiting themselves to a small group, and by taking certain assumptions for granted, they escape the more controversial questions about the impact of the German immigration, on which American historians have long been divided."
